Technology Solutions for Physician Practice

A commitment to value and quality. We know what it takes to improve care, lower costs and increase efficiency.

We recognize that a successful journey into automation isn't based on software, but rather a "Process". It shouldn't be a scary journey, but rather a well-planned experience that's proven and successful. By integrating software and hardware and combining it with multiple training options we make the journey successful. MedNet solutions offers options for your practice to adopt a variety of technology alternatives such as **electronic health record software**. You may have EHR, practice management software or are thinking about purchasing technology for your office. In either case, we may be able to save you significant dollars.

## MedNet Total Turn-Key Solutions

- EHR Consulting
- EHR Sales and Support
- Technology Infrastructure Support
- IT Managed Services
- Medical Billing and Audit Services

## With a Decade of Hands-On Experience, MedNet Gets Results !

As your partner, MedNet intends to assist each of our customers in the qualification process so that they are in a position to participate in the Stimulus payments that became available in 2011. The fact that your practice would be on a Meaningful Use certified e-MDs system and the fact that you will have partnered with an EHR expert in MedNet we can put your practice ahead of the curve and in good shape to participate in the Medicare/Medicaid incentives.

Call MedNet today to learn more about our intelligent approach to implementing technology in your medical office.
